Project Amount This Term: $ $1,068,788.11

Funding:
General ☐ **Enterprise** ☐ **3 Digit Fund Code** _____
CIP Line Item No. (if applicable): _____

SPLOST: ☐

GRANT: ☑ $ US Fire Administation Assistance to Firefighters Grant

$890,606.00 to be funded through AFG grant.

$178,182.11 to be funded from Fire Operatiing Funds. Cost Center 4925 Fund 270

Justification:

DeKalb County Fire Rescue was awarded a total of $890,606.00 for the purpose of adding direct source capture vehicle exhaust systems at all DeKalb County Fire Stations. This equipment is another key component to enhancing the occupational safety of our staff and reducing the exposure to cancer causing agents produced by vehicle exhaust. From the notice of award until this point we have been actively researching direct source capture vehicle exhaust systems and have found the preferred system to be manufactured by Plymovent. SafeAir Corporation is the authorized Georgia distributor of the Plymovent vehicle exhaust system. The local construction firm Johnson-Laux Construction specializes in Plymovent system installation and has a well-established working relationship with SafeAir Corporation. Johnson-Laux is also 1 of 28 awarded construction firms listed on the State of Georgia Indefinite Quantity Construction (EXIOC) Services Contract
