RE: Acquisition of the SmartCity Technology Business

On May 7, 2024, Rubicon Technologies, Inc. and its subsidiaries (including Rubicon Global, LLC) (collectively “Rubicon”) sold the assets of the SmartCity Technology Business to Wastech Corp (“Wastech”). As a part of the sale transaction, Rubicon assigned all customer contracts to Wastech. This includes the assignment of all right and title to the Sourcewell Cooperative Contract No. 020221 dated August 22, 2024 between Rubicon Global, LLC and Dekalb County, Georgia (the “Agreement”). The underlying agreement between Sourcewell and Rubicon that the Agreement “piggybacks” was assigned to Wastech on September 22, 2024.

On August 23, 2024, Routeware, Inc. (“Routeware”) purchased 100% of the outstanding shares of Wastech. As a result, Wastech is now a wholly owned subsidiary of Routeware. Wastech remains as the operating entity for the SmartCity Technology Business.

Given the fact that the underlying Sourcewell agreement that the Agreement “piggybacks” has been assigned by Rubicon to Wastech with Sourcewell’s approval and consent, and that the Agreement outside of the Sourcewell terms does not address or require any consent to assignment from the City, Wastech considers the Agreement to be assigned to Wastech and Wastech agrees to assume all of the duties and obligations under the Agreement going forward.

Thank you,

DocuSigned by:
