Michael Thurmond
Chief Executive Officer

Planning Commission Hearing Date: March 1, 2022

Board of Commissioners Hearing Date: March 24, 2022

STAFF ANALYSIS

Case No.:	Z-22-1245310	Agenda #: D4
Location/ Address:	The north side of Linecrest Road and the north and south sides of Whitfield Road, approximately 225 feet east of Bouldercrest Road at 2717, 2698, 2688, and 2670 Whitfield Road in Ellenwood, Georgia.	Commission District: 3 District: 6 Super
Parcel ID:	15-009-01-001,15-009-01-002,15-009-01-006,15-009-01-008	
Request:	To rezone from R-100 (Residential Medium Lot-100) District to RSM (Small Lot Residential Mix) District to allow the construction of single-family, detached homes.	
Property Owner:	SIL SF LLC & Ashbrooke Home Builders, Inc.	
Applicant/Agent:	Rockhaven Homes LLC c/o Battle Law	
Acreage:	22.5	
Existing Land Use:	Single-family home and vacant land	
Surrounding Properties:	Single-family, detached subdivisions and vacant land	
Adjacent Zoning:	North: RSM & R-100 South: NA Clayton County East: RSM West: R-100	
Comprehensive Plan:	SUB (Suburban)	Consistent <input checked="" type="checkbox"/> Inconsistent <input type="checkbox"/>
Proposed Density:	3.4 units per acre	Existing Density: NA
Proposed Units/Square Ft.:	77 single-family detached homes	Existing Units/Square Feet: Vacant Land and Single-Family Home
Proposed Lot Coverage:	NA	Existing Lot Coverage: NA

Staff Recommendation: APPROVAL WITH CONDITIONS

ZONING HISTORY

Based on DeKalb County records, it appears that the R-100 zoning of the property has not changed since adoption of the first *Zoning Ordinance* and map in 1956.

PROJECT ANALYSIS

The subject property comprises approximately 22.5 acres on the north side of Linecrest Road and the north and south sides of Whitfield Road, approximately 225 feet east of Bouldercrest Road at 2717, 2698, 2688, and 2670 Whitfield Road in Ellenwood, Georgia. The site contains vacant land and a single-family structure. The site slopes moderately upward from the southwest to the northeast. The site currently has an abundance of mature trees and vegetation. Since the March 1st Planning Commission meeting the applicant has submitted a revised plan (see attached plan submitted March 10, 2022) which proposes two full service access roads off of Linecrest Road and complies with the maximum 600 foot road block length to provide for appropriate traffic circulation. Additionally the revised plan demonstrates compliance with the perimeter lot compatibility requirements of the Zoning Ordinance which require that new single-family detached lots along the perimeter boundary be at least 80% as wide as abutting single-family lots with a 20-foot wide buffer to ensure compatibility with surrounding properties. The revised plan also provides tabular data demonstrating compliance with maximum building height, lot coverage, and building setback requirements of the Zoning Ordinance. No transitional buffers are required since the plan shows single-family detached lots along the external boundaries which abut existing single-family lots. The proposed RSM zoning and density of 3.4 units per acre is consistent with the existing RSM zoning to the north and east with densities of 3.2 units per acre. The proposed 5,000 square foot lots and 50-foot wide lot widths are generally consistent with the 6,000 square foot lots of the RSM zoned subdivision to the north and east (Ward Lake Subdivision).

The RSM Zoning District allows a base maximum density of four (4) units per acre, with a maximum density up to eight (8) units per acre if certain community enhancements or provisions are provided. Since the proposed density is 3.5 units per acre, no density bonuses are required.

Supplemental Requirements: There are no supplemental regulations in the *Zoning Ordinance* for single-family, detached homes.

Compliance with District Standards:

STANDARD	RSM REQUIREMENT	PROPOSED	COMPLIANCE
MAX DENSITY	4-8 units per acre	3.4 units per acre	Yes.
LOT AREA (MIN)	5,000 s.f.	5,000 s.f.	Yes
LOT WIDTH (MIN)	50 ft	50 ft	Yes
MAX. LOT COVERAGE	50%	50%	Yes
FRONT SETBACK	20 ft	20 ft	Yes

REAR SETBACK	20 ft	20 ft	Yes
SIDE SETBACK	3 ft from p/l with min. 10 feet between buildings	3 feet from p/l with min. 10 feet between buildings	Yes
MAX. BLDG. HEIGHT	35 feet	35 feet	Yes
MIN UNIT SIZE	1,200 s.f.	2,280 s.f.	Yes
MIN OPEN SPACE	20%	22%	Yes
TRANSITIONAL BUFFER	None required since single-family detached units are proposed along perimeter of site abutting single-family detached subdivisions	20 foot buffer along norther property line	Yes
PERIMETER LOT COMPATIBILITY	Lots on the external boundary of the site must be at 80% as wide as abutting lots of established subdivisions with a 20-foot wide transitional buffer.	Yes—plan provides for lots that are 80% as wide as abutting lots with a 20-foot wide transitional buffer.	Yes
STREETSCAPE IMPROVEMENTS	6 ft wide Landscape strip 5 ft wide sidewalk Street trees every 30 feet Street lights every 100 feet	Information not provided.	Undetermined—non-compliance will necessitate variances
PARKING	Min of 154 spaces (2 spaces per dwelling unit). Max of 308 spaces (4 spaces per dwelling unit)	308 spaces	Yes

LAND USE AND ZONING ANALYSIS

Section 27-7.3.5 of the Zoning Ordinance, “Standards and factors governing review of proposed amendments to the official zoning map” states that the following standards and factors shall govern the review of all proposed amendments to the zoning maps.

A. Whether the zoning proposal is in conformity with the policy and intent of the comprehensive plan:

Based on the submitted information, it appears that the proposed rezoning request is consistent with the policies and strategies of the Suburban Character Area and the *2035 Comprehensive Plan* to protect stable neighborhoods from incompatible development that could alter established single-family residential development patterns and density (Suburban Residential Protection Strategy, pg. 115).

B. Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby properties:

Since the March 1st Planning Commission meeting the applicant has submitted a revised plan (see attached plan submitted March 10, 2022) which proposes two full service access roads off of Linecrest Road and complies with the maximum 600 foot block length for the proposed internal roads. Additionally the revised plan complies with the perimeter lot compatibility requirements of the Zoning Ordinance which require that new single-family detached lots along the perimeter boundary be at least 80% as wide as abutting single-family lots with a 20-foot wide buffer to ensure compatibility with surrounding properties. The revised plan also provides the tabular data demonstrating compliance with maximum building height, lot coverage, and building setback requirements of the Zoning Ordinance. The proposed density of 3.4 units per acre is consistent with the RSM zoning and development pattern to the north and east containing single-family detached residential uses (Ward Lake Subdivision) at a density of 3.2 units per acre.

C. Whether the property to be affected by the zoning proposal has a reasonable economic use as currently zoned:

It appears that the property may have a reasonable economic use with current R-100 zoning, which allows single-family, detached residential development.

D. Whether the zoning proposal will adversely affect the existing use or usability of adjacent or nearby property:

Since the March 1st Planning Commission meeting the applicant has submitted a revised plan (see attached plan submitted March 10, 2022) which proposes two full service access roads off of Linecrest Road and complies with the maximum 600 foot block length for the proposed internal roads. Additionally the revised plan complies with the perimeter lot compatibility requirements of the Zoning Ordinance which require that new single-family detached lots along the perimeter boundary be at least 80% as wide as abutting single-family lots with a 20-foot wide buffer to ensure compatibility with surrounding properties. The revised plan also provides the tabular data demonstrating compliance with maximum building height, lot coverage, and building setback requirements of the Zoning Ordinance. The proposed density of 3.4 units per acre is consistent with the RSM zoning and development pattern to the north and east containing single-family detached residential uses (Ward Lake Subdivision) at a density of 3.2 units per acre.

E. Whether there are other existing or changing conditions affecting the use and development of the property, which give supporting grounds for either approval or disapproval of the zoning proposal:

There do not appear to be other existing or changing conditions affecting the use and development of the property which give supporting grounds for either approval or disapproval of the zoning proposal.

F. Whether the zoning proposal will adversely affect historic buildings, sites, districts, or archaeological resources:

Based on the submitted information, no historic buildings, sites, districts, or archaeological resources are located on the subject property or in the surrounding area.

G. Whether the zoning proposal will result in a use which will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools:

There has been no indication from reviewing departments and agencies that the proposal would cause excessive use of utilities. At the time of this writing the DeKalb County Transportation Department was still in review of the plan. The applicant will need to obtain a sewer capacity letter from the Department of Watershed Management to verify if sewer capacity is available.

H. Whether the zoning proposal adversely impacts the environment or surrounding natural resources:

The proposed development is not expected to have unusual impacts on the natural environment.

Planning and Sustainability Department Recommendation: APPROVAL WITH CONDITIONS (REVISED 3/10/22)

Since the March 1st Planning Commission meeting the applicant has submitted a revised plan (see attached plan submitted March 10, 2022) which proposes two full service access roads off of Linecrest Road and complies with the maximum 600 foot road block length to provide for appropriate traffic circulation. Additionally the revised plan demonstrates compliance with the perimeter lot compatibility requirements of the Zoning Ordinance which require that new single-family detached lots along the perimeter boundary be at least 80% as wide as abutting single-family lots with a 20-foot wide buffer to ensure compatibility with surrounding properties. The revised plan also provides tabular data demonstrating compliance with maximum building height, lot coverage, and building setback requirements of the Zoning Ordinance. The proposed RSM zoning with a density of 3.4 units per acre is consistent with the RSM zoning and development pattern to the north and east containing single-family detached residential uses (Ward Lake Subdivision) at a density of 3.2 units per acre. Therefore, it is the recommendation of the Planning & Sustainability Department that the application be "Approved" with the following recommended conditions:

1. Maximum of 77 single-family detached lots may be developed on the property.
2. General compliance with the site plan dated March 3, 2022 titled "Linecrest Road Tract".
3. A minimum of 20% open space shall be provided.
4. Healthy trees within the 20-foot transitional buffer along the north property line shall be preserved and supplemented with new trees to form an effective visual screen as approved by the County Arborist prior to the issuance of any certificates of occupancy.
5. Written confirmation of approval from the DeKalb County Transportation Department is required prior to the issuance of any building permits. 35 foot right of way dedication from centerline or such that all public infrastructure is within public right of way, whichever greater, 6 foot sidewalk, 4 foot bike lane (or 10 foot multiuse path in lieu of required bike lanes and 6 foot sidewalk), 10 foot landscape strip and street lights. Verify that the access point meets intersection and stopping sight distance based on AASHTO design guidelines when submitting for permitting. Interior roads require a 27.5 foot right of way dedication from the centerline or such

that all public infrastructure is on county right of way. Requires a 6 foot landscape strip, 6 foot sidewalk and street lights.

6. The approval of this rezoning application by the Board of Commissioners has no bearing on the requirements for other regulatory approvals under the authority of the Historic Preservation Commission, the Board of Zoning Appeals, or other entity whose decision should be based on the merits of the application under review by such entity whose decision shall be independently based.

N1- No comment

N2. Please see chapter 5 of the zoning code and chapter 14-190 of the land development code for infrastructure requirements. **Linecrest Rd** is classified as a collector road. Infrastructure Requirements: 35 foot right of way dedication from centerline or such that all public infrastructure is within public right of way, whichever greater, 6 foot sidewalk, 4 foot bike lane (or 10 foot multiuse path in lieu of required bike lanes and 6 foot sidewalk), 10 foot landscape strip and street lights. Verify that the access point meets intersection and stopping sight distance based on AASHTO design guidelines when submitting for permitting. Interior roads require a 27.5 foot right of way dedication from the centerline or such that all public infrastructure is on county right of way. Requires a 6 foot landscape strip, 6 foot sidewalk and street lights. Code Section 14-200 (e): 79 lots require two access points. This will require a variance to the Land Development Code prior to land development permit approval from the Transportation Division at time of permitting.

N3. No Comment.

N4 & N5. Memorial Drive is a State Route. GDOT review and approval required prior to permitting at land development stage.

N6. No comment

N7. No comment

N8. Please see chapter 5 of the zoning code and chapter 14-190 of the land development code for infrastructure requirements. Rockbridge Rd is classified as a minor arterial. Infrastructure Requirements: 40 foot right of way dedication from centerline or such that all public infrastructure is within public right of way, whichever greater, 6 foot sidewalk, 4 foot bike lane (or 10 foot multiuse path in lieu of required bike lanes and 6 foot sidewalk), 10 foot landscape strip and street lights. Verify that the access point meets intersection and stopping sight distance based on AASHTO design guidelines when submitting for permitting. Interior roads require a 27.5 foot right of way dedication from the centerline or such that all public infrastructure is on county right of way. Requires a 6 foot landscape strip, 6 foot sidewalk and street lights. Please note that the top section appears to have more lots per access than the code allows (Code Section 14-200 (e)- more than 75 units requires 2 access points). If access is allowed on Pepperwood- then Pepperwood to Hickory Hills Trail and Hickory Hills Drive to Rockbridge should be resurfaced by the developer and sidewalks added to connect to the new sidewalks in the proposed neighborhood to offset impacts. I would prefer to see the sidewalks added all the way to Rockbridge via Hickory Hills Trail and Hickory Hills Drive to reduce impacts to the existing property owners, if the existing property owners so desire sidewalks, but, at a minimum, the one lot sidewalk gap on Pepperwood should be eliminated.

Re: Rezone Application Review

General Comments:

DeKalb County Health Regulations prohibit use of on-site sewage disposal systems for

- multiple dwellings
- food service establishments
- hotels and motels
- commercial laundries
- funeral homes
- schools
- nursing care facilities
- personal care homes with more than six (6) clients
- child or adult day care facilities with more than six (6) clients
- residential facilities containing food service establishments

If proposal will use on-site sewage disposal, please contact the Land Use Section (404) 508-7900.

Any proposal, which will alter wastewater flow to an on-site sewage disposal system, must be reviewed by this office prior to construction.

This office must approve any proposed food service operation or swimming pool prior to starting construction.

Public health recommends the inclusion of sidewalks to continue a preexisting sidewalk network or begin a new sidewalk network. Sidewalks can provide safe and convenient pedestrian access to a community-oriented facility and access to adjacent facilities and neighborhoods.

For a public transportation route, there shall be a 5ft. sidewalk with a buffer between the sidewalk and the road. There shall be enough space next to sidewalk for bus shelter's concrete pad installation.

Since DeKalb County is classified as a Zone 1 radon county, this office recommends the use of radon resistant construction.

DEKALB COUNTY GOVERNMENT PLANNING DEPARTMENT DISTRIBUTION FORM

The following areas below may warrant comments from the Development Division. Please respond accordingly as the issues relate to the proposed request and the site plan enclosed as it relates to Chapter 14. You may address applicable disciplines.

DEVELOPMENT ANALYSIS:

- **Transportation/Access/Row**

Consult the Georgia DOT as well as the DeKalb County Transportation Department prior to land development permit. Verify widths from the centerline of the roadways to the property line for possible right-of-way dedication. Improvements within the right-of-way may be required as a condition for land development application review approval. Safe vehicular circulation is required. Paved off-street parking is required.

- **Storm Water Management**

Compliance with the Georgia Stormwater Management Manual, DeKalb County Code of Ordinances 14-40 for Stormwater Management and 14-42 for Storm Water Quality Control, to include Runoff Reduction Volume where applicable is required as a condition of land development permit approval. Use Volume Three of the G.S.M.M. for best maintenance practices. Use the NOAA Atlas 14 Point Precipitation Data set specific to the site. Recommend Low Impact Development features/ Green Infrastructure be included in the proposed site design to protect as much as practicable the statewaters and special flood hazard areas.

Additionally, looking at the conceptual plan provided, the two proposed detention ponds discharge points are towards existing adjacent properties (based on the drainage easements shown). Concentrated flow cannot be directed towards adjacent properties or leaving the site. An easement will be required through those adjacent properties to convey the discharge to an existing storm sewer structure or to prevent adverse effect on adjacent properties.

- **Flood Hazard Area/Wetlands**

The presence of FEMA Flood Hazard Area was not indicated in the County G.I.S. mapping records for the site; and should be noted in the plans at the time of any land development

permit application. Encroachment of flood hazard areas require compliance with Article IV of Chapter 14 and FEMA floodplain regulations.

- **Landscaping/Tree Preservation**

Landscaping and tree preservation plans for any building, or parking lot must comply with DeKalb County Code of Ordinances 14-39 as well as Chapter 27 Article 5 and are subject to approval from the County Arborist.

- **Tributary Buffer**

State water buffer was not reflected in the G.I.S. records for the site. Typical state waters buffer have a 75' undisturbed stream buffer and land development within the undisturbed creek buffer is prohibited without a variance per DeKalb County Code of Ordinances 14-44.1.

- **Fire Safety**

Plans for land development permit must comply with Chapter 12 DeKalb County Code for fire protection and prevention.

Please provide additional information relating to the following statement.

According to studies conducted by the Institute of Traffic Engineers (ITE) 6/7TH Edition (whichever is applicable), churches generate an average of fifteen (15) vehicle trip end (VTE) per 1, 000 square feet of floor area, with an eight (8%) percent peak hour factor. Based on the above formula, the _____ square foot place of worship building would generate _____ vehicle trip ends, with approximately _____ peak hour vehicle trip ends.

Single Family residence, on the other hand, would generate ten (10) VTE's per day per dwelling unit, with a ten (10%) percent peak hour factor. Based on the above referenced formula, the _____ (Single Family Residential) District designation which allows a maximum of _____ units per acres, and the given fact that the project site is approximately _____ acres in land area, _____ daily vehicle trip end, and _____ peak hour vehicle trip end would be generated with residential development of the parcel.

COMMENTS:

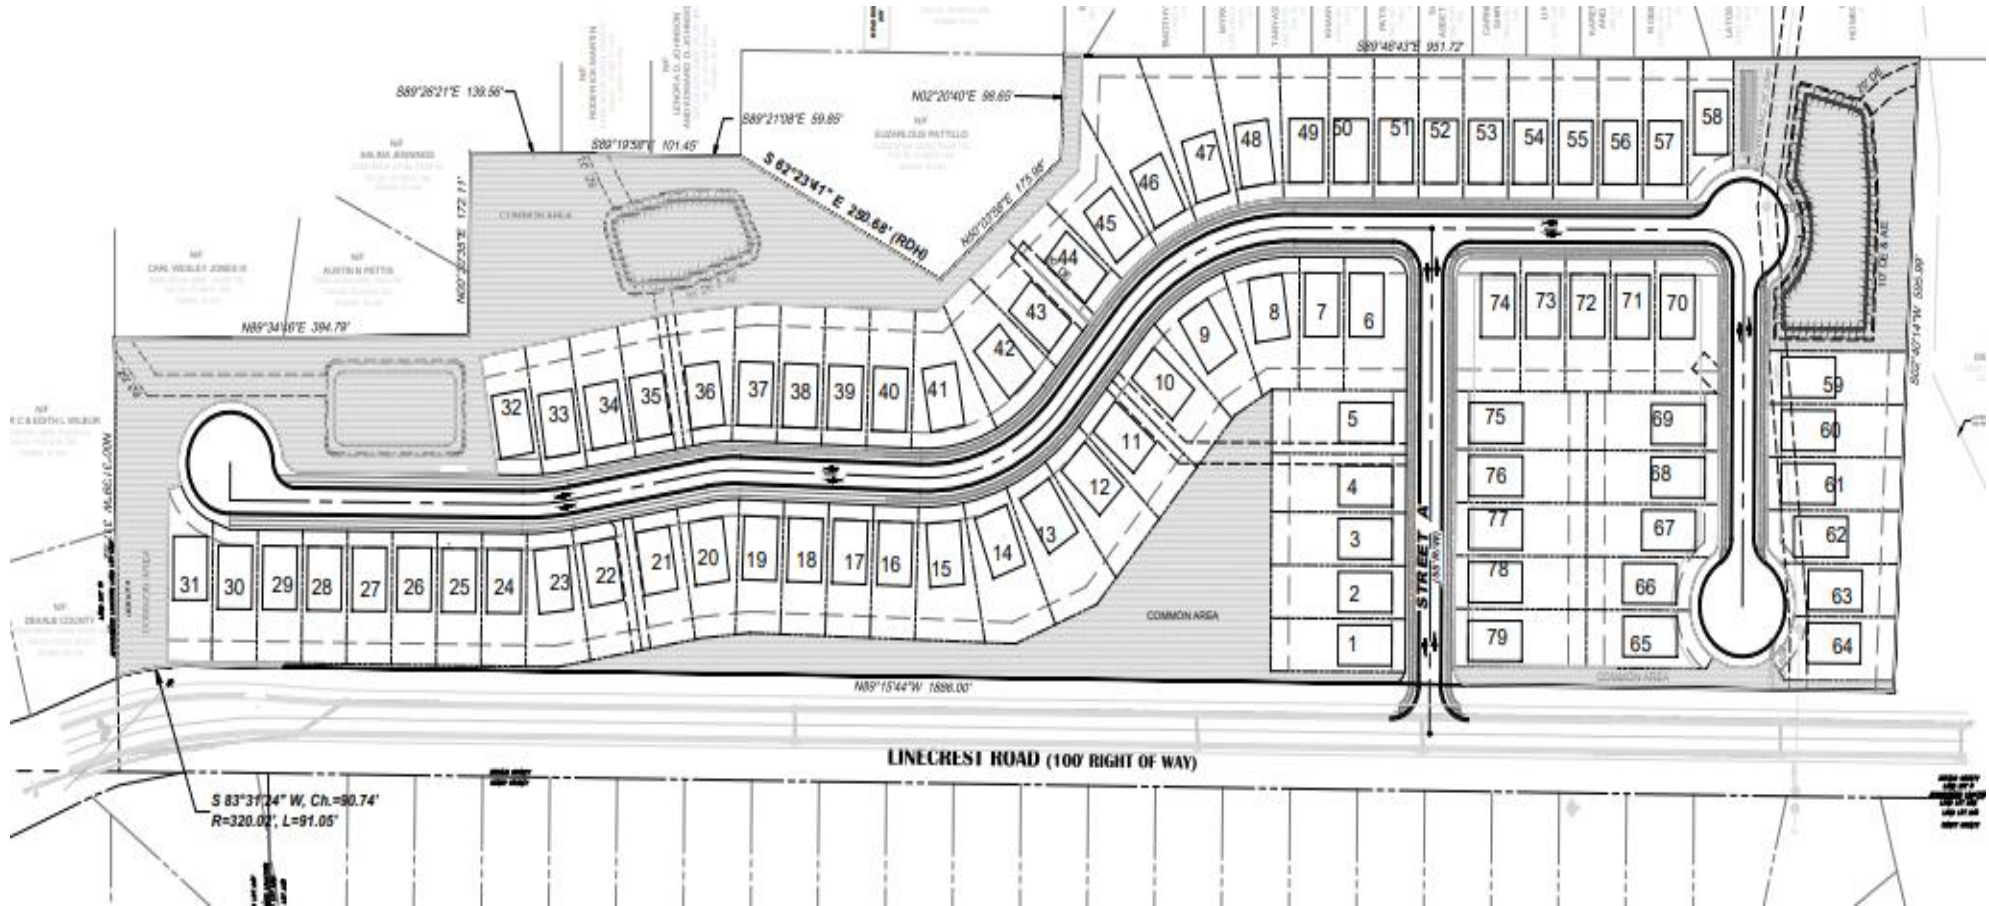

Plans and field reviewed. Nothing found that would disrupt traffic pattern flow.
