

**Georgia Statewide Contract No. 99999-SPD-SPD0000025-002  
RECOMMENDATION FORM**

**User Department's Recommendation**

**Recommended Firm:** Convergint Technologies

**User Department:** Innovation and Technology

**APPROVE (Please circle one):**    YES                      NO

**Name of Fund:** Renewal and Extension Fund 513 (88061.100057.542309.513)

**Contract Award Amount:** \$336,505.25

**Justification:**

The purpose of this project is to replace all existing obsolete equipment associated with the Department of Watershed's stand-alone, non-integrated surveillance camera system. The new equipment is fully compatible with the DCG enterprise surveillance camera system. This solution includes Avigilon cameras and the associated software license for each camera. The cameras will be integrated into the existing DCG enterprise Avigilon system along with the associated camera license. The video storage will reside on the existing DCG enterprise video storage system that includes short- and long-term video retention and segment extraction capabilities for event investigations. The cameras will be mounted by the DoIT low-voltage contractor, R&B Communications. Any required professional services to integrate the cameras and configure custom data retention policies will be performed by DoIT along with Avigilon support services. The final solution will work seamlessly with our existing DCG enterprise video surveillance camera system.
