Antoinette, Willie, this morning I spoke with a representative for Xylem/Pure/Wachs, and his message was that they are willing to continue work immediately as soon as they have a signed contract in hand; they are willing to separate the contract time extension from the name change issue which affects the payment of their invoices.

Willie, you mentioned a while ago that you could issue the CO for a time extension on Wachs “right now”, the issue was that we were trying to do the name change from Wachs to Xylem at the same time. If so, can you do that now while we continue to work on the name change issue?

Kind regards,
Arjen
