General ☐ Enterprise ☒ 3 Digit Fund Code 511
CIP Line Item No. (if applicable): _____**Justification:**

The Department of Watershed Management (DWM) recommends Petroleum Traders Corp as the recommended bidder based on the total from the bid tabulation form. This bidder is the lowest, responsive, responsible bidders according to the price quoted. This contract is utilized by the Department of Watershed Management to purchase diesel to refuel generators and standby pumps at the counties 12 storage tanks and multiple lift stations. The diesel is also needed at the Scott Candler plant to refuel generators and backup diesel pumps. Without the diesel fuel the plant will not be able to run or pump water in the event of a storm or power loss. The Distribution tanks would have no backup power source to pump water to the citizens. And the lift stations would not have a backup source to pump wastewater resulting in sewer spills. The lack of diesel would result in fines and customer complaints. The Department is requesting more funds compared to what was spend on the previous contract because the purchase of diesel will occur via this contract only . Diesel will no longer be refueled from the Roadhaven service station .
