To Whom It May Concern:

This letter is in regards to "Indi" a 9 year old neutered male Belgian Malinois. (DOB 11/8/2011). His handler is Officer Norman Lawson.

Indi has had multiple injuries to his feet over the years. He was treated for benign prostatic hypertrophy and neutered in 2016. He exhibits mild stiffness in both rear legs due to pain in his coxofemoral (hip) joints which is most likely due to mild arthritis. He also has a recurrent lameness in his left rear leg (first noted in 2016) which is most likely a soft tissue injury that he periodically aggravates.

Indi has had minor dental tissues which I will be reviewing at his next annual visit and we are monitoring several growths on his skin.

Last but not least, he suffered a gunshot wound to his head resulting in minor skull fractures and the loss of his right eye in 2018.

At this time I am recommending Indi be retired.
Please contact me if you have any further questions,

Sincerely,

Sylvia A. Bell D.V.M.
