Request to add \$895,608.00 to approved contract value. The three new services and license are for MS Security enhancements as required for advanced security monitoring, and alerting. These services introduce Artificial Intelligence (AI) interventions to prevent cyber-attacks in our MS Tenant and on-premises systems. AI provides real-time advanced protection that is constantly changing and improving our system security by proactively intervening and stopping and/or eliminating threats. AI cyber-security systems can react completely and more efficiently than other traditional capture-and-report systems.
