Project Amount This Term: \$1,250,000.00	
Funding: General ☐ Enterprise ☐ 3 Digit Fund Code CIP Line Item No. (if applicable):	
Justification:	
The Electrical Switchgear Inspection and Repair contract provides a vital service to all three (3) treatment facilities and the collection system. This contract is needed to maintain and repair the electrical equipment for the 3 plants, river station, 66 lift stations, 6 booster pump stations and 12 water storage tanks. The voltages range from 120V to 4160V equipment. Without proper maintenance and timely repairs of the electrical equipment, DWM could experience a public health issue. This may result in inadequate water pressure, sewer spills and, improper treated drinking water and wastewater entering the waters of the state. This contract is necessary to ensure all electrical conveyance equipment is up to standard and working properly. It ensures continuity of power throughout the facilities if there is an interruption on one of the power sources.
