

PARK CONNECTIVITY

Although a signalized crosswalk currently connects Shoal Creek Parks I and II, Park Pride examined options for creating a safer park user experience crossing Glenwood Road. These options are explained on the vision plan for Shoal Creek Park I.

DRAINAGE
Add yard inlets and landscape to address areas of standing water after rain storms.

DOG PARK
Open space near the center of the park is offered for off-leash doggy play and for neighbors with dogs to meet each other. Separate spaces for large and small dogs.

SPORTS COURTS
Tennis and basketball courts continue to be provided as important features of the park.

PERMEABLE PAVING
Consider permeable pavement options when repaving parking lots in Shoal Creek Park II.

PLAYGROUND
An expanded playground replaces the existing play equipment with updated features and newer amenities.

NEW SHELTERS & SEATING
More places to sit and watch games at the existing basketball and tennis courts, including small shelters and additional trash cans.

SAFETY & OPEN VIEWS
Strategic placement of lighting and other security features like emergency call buttons and cameras, along with increased community use, and a higher standard of maintenance will increase perceptions of safety. On this plan, lights are suggested by yellow circles. Locations for cameras or emergency call boxes may also be considered.

PICKLEBALL & DISC GOLF
Pickleball is a fast-paced cross between ping pong and tennis and is the fastest-growing sport in America. This plan suggests repurposing two tennis courts for use as pickleball courts. There is also enough space to create a disc golf course in the area east of the trail.

COMMUNITY GARDEN
Survey responses indicate a desire for a shared community space for growing food.

NEW ENTRANCE & OVERLOOK
Pedestrian and cycling entrance to Shoal Creek Park II along Creekside Court offers a view of Shoal Creek and access to the wetland trail.

MULTIUSE TRAIL
Paved and lighted bicycle trail provides access through park and connects all three Shoal Creek parks with each other.

INVASIVE REMOVAL
A program of invasive removal is needed to restore the natural character of the landscape and create a safer, open park.

WATERFALL TRAIL
Hiking trails provide access to view the rocky shoals and some larger waterfalls in the park.

NEW ENTRANCE
Pedestrian and cycling entrance to Shoal Creek Park II along McAfee Rd

to Shoal Creek Park II
