

MARKET SURVEY

Solicitation Number: 2025-167-ITB **Agent:** Brian Wilcox

Project Name: Seminole Road MSW Landfill 2026 Gas Collection and Control System (GCCS) Expansion **Department:** Sanitation

Prepared By: Brian Wilcox

Company	Contact Person	PoC's email address	Reason for not bidding
Brown Management Services (BMS) Enterprises, Inc.	Hugh Brown	hbrown@bmsentinc.com	Decided not to submit a bid as a prime contractor due to the project's size, experience requirements, the availability of drillers, and insurance requirements. Participating in this project as a subcontractor instead.
Continuum Environmental Services, Ltd.	Nik Baldis	nbaldis@continuumenv.com	Workload issue.
Engineered Machined Products, Inc.	Autumn Pifke	escadvpos@emp-corp.com	Does not offer the products or services sought as advertised in the specifications.
Oasis Consulting Services	Richard Magahey	rmagahey@oasis-cs.com	Considered as a Subcontractor for the project, did provide pricing as a LSBE Subcontractor for this project.
Results Summary	The non-bidders listed above offered various reasons why they did not submit bids, including that the project scope of work is beyond the scope of services they offer and that they quoted certain project components as potential suppliers, service providers or subcontractors for one or more bidders. There were four (4) addenda issued, including extending the bid's due date twice in efforts to yield more participation. After extensions and further market surveys, it was determined that extending a third time would have yielded no further participation. This project is of a specialized industry, therefore, is highly limited on available and qualified vendors to perform this project.
