Superior Court Parking Cameras on SSP Fiber - #20220201 v1

Attention:

Captain Sanchez

Pricing is good for 30 days

SSP proposes to furnish and install new conduit, cable/fiber and 6- new cameras for the following areas:

At the entrance gates we propose installing a 360 degree camera with 4 each 3.0 MP sensors for a full view of inbound vehicles with an advantage of reading tags. We propose installing this cameras with IR sensors due to low light conditions.

At the exit gates we propose installing a 180 degree camera with 3 each 5.0 MP sensors for a 180 degree view of outbound vehicles. We propose installing this cameras with IR sensors due to low light conditions.

For the Judges secured parking area we propose installing 2.0 MP next level analytic cameras at both pedestrian gates and at both vehicle gates with the main purpose of watching these points of egress and ingress for unauthorized personnel attempting to circumvent this area.

We propose routing conduit from our P-2 junction box into a new cabinet that will house a new hardened PoE switch and PoE Injectors for the multi-sensors. We will connect the new switch to SSP's installed fiber infrastructure from this new cabinet. We propose routing conduit to the final camera locations and installing all cable inside the conduit raceway.

This proposal excludes any X-ray, GPR, or magnetic imaging and coring through slab or tension floor.
