(Additional information, attach pages if required):

The vendor currently has a proprietary product titled Accurint Virtual Crime Center (AVCC) that combines law enforcement and public records data in a web-based Criminal Justice Information Systems (CJIS) compliant environment. AVCC provides a critical investigative intelligence and crime reporting tool for the Police department.

The product is a sole source as well in the fact that LexisNexis takes in data from more than 10,000 current and historical sources including more than 2.5 million new records a day. This equates to over 728 million unique identities from which information can be compiled from one search. A public safety data and public records data exchange all in one platform.

Having these unique features that include an extremely large data pool, the Department and County will benefit by obtaining a state of the art web-based Agency wide tool to assist in solving crimes and capturing data trends in a single search.
