Vendor 4:

Name/Amount

**Justification:**

The aforementioned contract is set to expire January 31, 2020 and requires a renewal for utilization by the Department of The Department Watershed Management (DWM) for the period of February 1, 2020 - January 31, 2021. The Cement contract is utilized to support pipe installation projects as well as building manholes, curbing, patching and the repair of walls, roads, driveways, etc. As the Department of Watershed Management ramps up the renewal of annual water and sewer contracts we anticipate the demand to increase over last year of approximately 25% across all contract lines items. The Operations Division plans to introduce additional renewal efforts for 2020 which will also increase the use of cement to consistently keep up with new development and self-performing in house work.
