

ITB No. 19-101202 – Installation of Data, Voice and Multimedia Cabling

User Department's Recommendation

User Department Name Department of Innovation and Technology

Recommended Bidder(s) meets our approval: We agree with the recommendation of P&C concerning the response to ITB 19-101202 for the installation of low voltage wiring. The bid response from GC&E and R. B. Communications meet our requirements as necessary to support county low voltage and similar technology related work.

Bidder 1: GC&E \$70,613.09 Bidder 2: R. B. Communications \$71,572.82
Name/Amount Name/Amount

Project Amount This Term: \$ \$200,000.00
 ~\$100,000 to GC&E
 ~\$100,000 to R. B. Communications

Funding:

General **Enterprise** **3 Digit Fund Code** 100

CIP Line Item No. (if applicable): _____

Justification:

The low voltage wiring is required to support and extend the existing voice and data networks throughout the county. As additional network locations are added, changed, and upgraded the services of GC&E and R. B. Communications fully meet our requirements, and we will try to divvy up work as equally as possible over the term. The work must be performed by licensed low voltage electricians and cannot be performed by in-house staff. The work also includes mounting of wireless access points, security cameras, and smart televisions used as conference room smart boards. GC&E and R. B. Communications have similar qualifications and are capable of providing the work as required.
