Equipment with a current per-unit fair market value in excess of \$5,000 may be retained or sold. The sub-grant funded share of proceeds from the sale can be reinvested in a like piece of equipment.

Reference 2 CFR 200.313 "Equipment"

Current condition of equipment: Equipment is in poor condition and has not been serviced or used in over 5 years. The cost to purchase the equipment at a discounted (used) price with the additional cost to recertify the equipment would likely surpass the value or usability of the equipment if the equipment were to be purchased by a third party. There is the likelihood that if the equipment were donated to organizations with less financial means the cost to recertify the equipment could lend some useful purpose. DeKalb County Fire Rescue would prefer to donate the equipment if possible, however will dispose the equipment in the event it cannot be donated. NAFECO estimates the entire lot of equipment to be valued at \$12,000.00 due to the poor condition and needed repairs. See attached letter from NAFECO to validate stated value.
