Subject: Sole Source Letter

Dear Ms. Chapital:

The IBISTRAX-HD3D products use the IBISTRAX-HD3D technology, encompassing a number of patents protected in the United States and throughout the world. As such, manufacturing and servicing these products require access to proprietary, commercially-sensitive information that is only usable by those employees of **Ultra Electronics Forensic Technology Inc.** (hereinafter referred to as **Forensic Technology**), who have been duly authorized and trained to do so.

Consequently, Forensic Technology is the only company that can provide their proprietary products, IBIS, IBISTRAX-HD3D (BRASSTRAX-3D Acquisition Station and BULLETTRAX-3D Acquisition Station), MATCHPOINT, MATCHPOINT+ and Data Concentrator hardware and software, as well as maintenance, upgrades and service, including data migration, moving and training services pertaining thereto. Furthermore, IBISTRAX-3D and IBISTRAX-HD3D, currently in use in the United States under the ATF NIBIN program, is the only technology that will work on the NIBIN Network, as other technologies are not compatible with the NIBIN Network.

Sincerely,

A handwritten signature in black ink, appearing to read "BH" followed by a stylized flourish.

Brandon Huntley
Manager, Forensic Intelligence Strategy - North America
