Total Amount Spent to Date: \$4,283,664.92

User Department Recommendation:

The purpose of this is to add funding (\$1,500,840.00) to the Azure Service credit contract. As the county continues to increase our utilization of Microsoft Azure services including computer processing and data storage, the services must be paid for in advance. The Microsoft Azure Service Credits program is like our Microsoft Enterprise Agreement for software license and services by prepaying for the services and license. Because of increases in our system backups, video storage, managed database instances, and business applications being moved to Microsoft Azure our annual utilization has increased in cost and complexity. New approved amount \$5,784,814.68.
