NCPR – Sole Source – Syntech Systems, Inc. Date: December 15, 2017

**Agent Review and Recommendation:** Fuelmaster is one of the main fuel management systems for both commercial and municipal fleets. Syntech Systems is the sole source dealer for the operating system. In order for another vendor to upgrade DeKalb County's current fuel management system, all the Fuelmaster units would need to be removed and replaced with a completely different system which would not be cost efficient and is currently cost prohibitive to Fleet's budget. By continuing to utilize the current Fuelmaster operating system, the department can both upgrade the system and stay within their budget.
