AGENDA ITEM:

Commission District(s): All

SS - Non-pathogenic Anaerobic Bacteria Chemical: for use by the Department of Watershed Management (DWM). Consists of providing a unique group of biologically based products for the treatment of hydrogen sulfide gas formation as well as products for fat, oil, and grease (FOG) prevention in waste water collection systems. Awarded to State Chemical Manufacturing Company d/b/a State Chemical Solutions. Amount Not To Exceed: \$540,000.00.

Information Contact: Talisa Clark, CPPO

Phone Number: (404) 687-2797

PURPOSE:

Awarded by the BOC on March 27, 2018 for an amount not to exceed \$390,000.00. On January 24, 2017, the BOC approved the 1st Sole Source for an amount not to exceed \$308,000.00. Consists of purchasing a unique group of non-pathogenic anaerobic bacteria and a nutrient chemical treatment program for hydrogen sulfide, grease and odor control for use at County water plants. DWM has performed tests and trials using similar blends produced by other vendors; however, State Chemical Solutions is the only company that has provided the most effective blend of bacterial and nutrient treatment to date. The efficiency of the chemicals has helped to save the County money since fewer chemicals are needed to reach the intended results. The importance of

this program is to prevent pumps and force mains from clogging up and causing eventual sewer spills. This request will provide for the continuation of usage for an additional one (1) year period.

RECOMMENDATION:

Recommend approval of the sole source with:

State Chemical Manufacturing Company d/b/a State Chemical Solutions, 5915 Landerbrook Drive, Mayfield Heights, OH 44124

Amount Not To Exceed: \$540,000.00
