Public Hearing: YES ☐ NO ☒ **Department:** Board of Commissioners - District 6

SUBJECT:

Commission District(s): Districts 4 & 6

Approve \$100,000.00 from District 6 ARP appropriations to support a Brannon Hills Public Health and Public Safety Fund

Information Contact: Commissioner Edward “Ted” Terry

Phone Number: 404-371-4909

PURPOSE:

To appropriate District 6 ARP funding to establish a Brannon Hills Fund to support current and future public health and public safety initiatives implemented by Public Safety, other DeKalb County departments, and service providers that can address the myriad Brannon Hills Condominium resident’s needs.

NEED/IMPACT:

Brannon Hills condominiums has been dubbed the worst neighborhood in America. The 369-unit condominium association was once an affordable but livable option for Somalian refugees in the 1980s. The condos were so inexpensive that buyers were able to pay cash and avoid having to obtain mortgages. These modest dwellings were their piece of the American Dream. But over the years, owners say that Brannon Hill has been led by a corrupt board. For years they collected assessments but never seemed to do any maintenance or repairs where conditions are less suited for the third-world inhabitants, many of whom are former refugees from east Africa and the middle east. Squaller and uninhabitable units fester violence and crime.

In 2017, the county began a phased approach to cleaning up the Brannon Hill complex and demolishing vacant and damaged units. Phase I consisted of demolishing two buildings (28 units) and removing more than 1,200

tons of debris in July 2017. Phase II consisted of demolishing an additional two buildings (40 units) in December 2017.

DeKalb County has literally been putting out fires as they erupt, and joint efforts to increase police presence, strategies to arrest and convict violent offenders, and major cleanup efforts are some of the initiatives the County has implemented to help mitigate the crime as a public health issue, however additional funding is needed to specially address this underserved community, which unfortunately, are the ones that have systematically struggled getting the resources that they need.

FISCAL IMPACT:

This District 6 ARP appropriation of \$100,000 will provide financial assistance to implement and support current and future public health and public safety initiatives.

RECOMMENDATION:

Approve the District 6 ARP appropriation to support current and future public health and public safety initiatives implemented by Public Safety, other DeKalb County departments and service providers that can address this myriad of needs.
